Attachment: Abstract of the Disclosure

**ABSTRACT OF THE DISCLOSURE**

A phosphor emitting visible light can be emitted by being excited by light from a light source. Phosphor is contained in a path through which the light of the light source is guided. A wavelength-converting phosphor that emits light by being excited by the light of the light source is provided in a waveguide path leading to a point where the light of the light source is transmitted through a waveguide plate and is outwardly emitted.
